Employment

Master Researcher - Applied AI, Ericsson Research

January 2023 - Present

- Conduct applied research in Agentic AI, focusing on AI exposure, single- and multi-agent architectures, and interactions with the physical world (IoT, networks, APIs).
- Lead internal architecture, prototyping, and cross-BU collaboration (BNEW, BCSS, Vonage), including a showcase at the Ericsson Technology Conference (ETC) 2025.
- Received the Ericsson Key Contributor Award (2025), recognizing the top 10% of performers company-wide.

Master Researcher - Web and IoT, Ericsson Research

April 2018 - Present

- Working with Web APIs in the context of Vonage. Implemented multiple prototypes in the domain of constrained IoT and Web development.
- Expert on IoT/Web protocols and technologies, providing guidance within Ericsson BUs (BDGS, BTEB) as well as in standardization and academia.
- Various design and prototyping activities with internal and external demos in Ericsson, MWC and other venues.
- IETF CoRE WG co-chair since 2016 and contact person in Ericsson for the IETF CoAP protocol standardization strategy.
- DMSO Working Group co-chair 2017-2024 and contact person in Ericsson for the LwM2M device management standardization strategy.
- LwM2M Specification coauthor. LwM2M builds on top of CoAP and is now a standard in network modules and deployed on hundreds of millions of devices and part of 3GPP, GSMA eSIM, IIC, Global Platform, 802.11/802.15.4 stacks, and other non-IoT stacks.
- IPSO Objects coauthor and co-chair.
- IANA Expert Reviewer, evaluating requests for specific registrations in IANA-managed namespaces.
- Coauthored the Industrial Internet Consortium (IIC) Connectivity Framework specification.
- Led together with IPRL the creation of Ericsson's non-3GPP device IPR portfolio covering IETF and OMA standards.
- Actively contributed to and coordinated various European and Finnish initiatives, including prominent projects such as H2020 and EIT-HII, among others, while also supervising students and colleagues involved in these projects.

Senior Researcher / System Architect IoT Accelerator, Ericsson Research

Dec 2008 - Mar 2018

- Led IoT and IoT device management research.
- Worked as an architect and developer in Ericsson's IoT Accelerator unit.
- Implementation and design for low-power IoT and Capillary Networks demo showcased in MWC 2015.
- Coordinated EU/National projects (FP7 COMMUNE, MAMMOTH, etc.)

Education

Royal Institute of Technology (KTH), Stockholm, Sweden

2009 - 2011

- Master's program "Communications Systems, Security and Mobile Computing: Advanced Inter-networking, Internet Security and Privacy, ICT Entrepreneurship and Venture Creation, Network Services, Advanced Routing in Packet Networks, Management of Networks and Networked Systems, Security in Mobile and Wireless Networks.

- Awarded NordPlus Scholarship (2010-2011) for excellent EU/EEA citizens, funded by the Nordic Council of Ministers.
- *Thesis: Adapting a DHT to a Self-Reliant M2M Network* - [urn:nbn:se:kth:diva-44293](https://nbn-resolving.org/urn:nbn:se:kth:diva-44293)

Carlos III University, School of Computing, Madrid, Spain

2003 - 2007

- Graduate Computer Engineer, Major: Programming
- Programming, Intra/Inter-domain Routing, Databases, Software Development, Computer Architecture and Organization.
- *Thesis: Implementation and performance of REsource LOcation And Discovery (RELOAD)* - [pdf](#)
